OBJECTIVE

4th-semester Computer Science student at UNIFOR and Full-Stack Development student at Digital College, with hands-on experience as a freelance web developer (React, Vite, Tailwind CSS). Seeking an internship opportunity in Information Technology or software development to apply my experience in real-world front-end projects and automation, contributing to an innovative environment while continuously growing my skills.

EDUCATION

University of Fortaleza (UNIFOR) 2025-2028

Computer Science – 4th semester.

Digital College *in progress*

Full-Stack Development.

TECHNICAL SKILLS

- React, Vite, and Tailwind CSS — building landing pages and web apps
- Java, JavaScript, HTML5, and CSS3
- Git and GitHub (version control workflow, continuous deployment)
- Deployment and hosting: Vercel and GitHub Pages
- Visual identity and SVG design (logos, brand systems)
- PWA (Progressive Web Apps): manifest, service worker, icons
- Privacy best practices and LGPD (Brazilian data protection law) compliance for local data storage
- AI-assisted development and content tools: Claude Code, ChatGPT, and Gemini for coding, research, and workflow support; Luma AI for AI-generated video content
- Basic knowledge of hardware, software, and user support
- Arduino, ESP32, and VS Code
- Object-Oriented Programming
- Intermediate English (technical documentation reading)

EXPERIENCE

Freelance Web Developer 2024–Present

- Built complete landing pages and web apps using React, Vite, and Tailwind CSS for local clients, covering the full cycle: design, development, real content integration (photos, copy, and testimonials), and deployment.
- Reused and adapted code architecture across distinct projects, including complete visual rebranding (brand identity, color palette, and typography) for different clients and industries.
- Owned the full delivery cycle: version control with Git/GitHub and production deployment via Vercel and GitHub Pages.
- Created design systems from scratch (brand identity, CSS foundations, reusable components) for interactive, multi-page web platforms.
- Researched and curated visual assets while respecting copyright, including sourcing public-domain imagery.
- Developed a mobile PWA (Progressive Web App) for professional third-party use, including a multi-step registration form, PDF report export, automated email delivery, and calendar file (.ics) generation.
- Implemented complete PWA infrastructure (manifest, service worker, icons) with strictly local data storage, following LGPD compliance best practices.
- Created custom SVG animations and developed visual identities (including logo design) for various projects and product concepts.

Private Writing Tutor 2024–2025

Communication, organization, problem-solving, and one-on-one tutoring.

Digital Marketing Support – Church 2023–Present

Team collaboration, organization, and communication.

CERTIFICATIONS

- Java: Applying Object-Oriented Programming – Alura
- Programming Logic with JavaScript – Alura
- Practicing JavaScript: Loops – Alura
- Getting Started with Programming – Alura

SOFT SKILLS

Organization, attention to detail, communication, continuous learning, proactivity, and teamwork.
